

<b>SUBJECT: SERIAL NUMBER IDENTIFICATION ON TAUTLINER KITS, AND LOCALINER KITS – TBK, LBK, TSK, AND LSK</b>
---

- On curtain/side truck and trailer kits, we now metal stamp a  $\frac{1}{4}$ " high 6-digit identification number on the lower roadside front wall post. Utility Trailer Manufacturing Company will stamp a 4-digit order number, a dash (-), and a two-digit unit number (i.e. "6055-01"). Utility Trailer Manufacturing Company will not stamp year or factory I.D.
- This is serial number identification for service and insurance purposes only and not a VIN certification.
- Utility Trailer Manufacturing will not stamp serial numbers on any assembly other than front wall. Body assemblers may mix and match components to varying specs. The front wall determines the serial number
