PRODUCT INFORMATION LETTER #530

Date: August 2010

Subject: Meritor Tire Inflation System (MTIS™) by PSI™
Thru-Tees and Hoses Changed from Yellow to Green

ArvinMeritor is pleased to announce that effective immediately, Meritor Tire Inflation System (MTIS™) by PSI™ thru-tees and tire hoses will be changed from yellow to green to reflect the environmentally-friendly qualities of MTIS.

Some of the Benefits of MTIS

In study after study, fleets across North America have experienced the cost-saving benefits of using MTIS to maintain tires at their proper pressure. Some of the benefits of MTIS include increased fuel economy, longer tread life, better preservation of tire casings for more retread yield, and fewer tire-related roadside service calls.

The Environmental Protection Agency's (EPA) SmartWay Transport Partnership has recognized automatic tire inflation systems as innovative technology that can make ground transportation more efficient and cleaner for the environment.

New Green Color Only Affects the Appearance of the Components

The new green color does not affect the fit or function of the thru-tees and hoses, only their appearance. The new green components are fully backward-compatible and can be used to replace yellow thru-tees and hoses on any MTIS by PSI product produced in 1997 or later. There are no part number changes associated with the new green color, and customers can continue to place MTIS kit orders as usual.

For more information on the Meritor Tire Inflation System (MTIS) by PSI, please contact your ArvinMeritor representative. You can also access MTIS product and service information in the Literature on Demand section of www.arvinmeritor.com.
